# **Data-Informed Decision-Making with Student Activity Hub Use Cases from Academic Programs**

**Marcela Alvarez**, Director of Data Analytics and Reporting, Jacobs School of Engineering  
**Rachael Lapidis**, Strategic Program Manager, School of Social Sciences

UC San Diego

# Student Activity Hub Overview

MISSION

Advance the state of student data management and student analytics in order to achieve our institutional goals, as diverse as they may be, while protecting institutional autonomy and control over all data.

PROBLEM

The SAH tackles the student data management and analysis problems, giving control to the institution. Student data is typically sprawled throughout multiple systems making deep analysis on the fly difficult.

SOLUTION

Aggregated data from multiple systems is curated in views that make sense to an analyst. With its security, scalability and sophistication, we can integrate any and all student data.

OUTCOME

The goal is modest. We want to help institutions leverage a common, but easily tailored or customized solution. Our goal is not to “sell” large numbers of SAH. We just want to make a difference where we can and collaborate with peers.

# SAH Publishing Model

# Goal

---

Demonstrate how Student Activity Hub (SAH) can advance student retention and success, raise graduation rates, and has helped UC San Diego achieve critical organizational goals.

# Agenda

1. Ad hoc Reporting
2. Core Reporting
3. Lessons Learned
4. Discussion + Q & A

## AD HOC REPORTS

---

- Reports created for a specific use or to answer a precise question on an “as needed” basis.
  - Gather information, test theories, probe solutions
  - Changing circumstances
  - Grant Proposals
  - Continuous improvement
- One-time need, or evolution into a core report

# PRE & POST SAH

## DATA WAREHOUSE

- Pull data from pre-built reports OR with SQL
- Users without SQL knowledge or access would need to partner with IR to obtain data
- Time-sensitive questions could go unanswered

## STUDENT ACTIVITY HUB

- Developers access SAH fields through BI tools
- Requires less technical training (SQL) to begin
- Since requests can be satisfied locally, user needs can be prioritized efficiently

# Graduate Cohort Sizing

- New graduate funding policy governing years and value of guaranteed support
- How many 6th year grads have we had for two given years?
  - With SAH - simple table in <10 min
  - Department can plan to place students, and work towards timelier progress to degree

Most Y Dept. PhD Students (FA15 and FA16 Cohorts) Persist into Year 6; Most Complete before Year 7

Graduate Cohort Term	Term Code										
	FA15	FA16	FA20	WI21	SP21	FA21	WI22	SP22	FA22	WI23	SP23
Fall Qtr 2015	21	21	14	13	12	2	2	2			
Fall Qtr 2016		21	20	20	20	16	17	15	4	4	4

# Graduate Cohort Sizing

---

- Considerations when setting Incoming graduate student target
  - Funding obligations to continuing students
  - Students may receive funding from outside a department
  - A department may fund outside students
  - Funded students may be past their guaranteed support time
- No existing report brought together all of these pieces
- SAH helped to connect payroll expense distribution by Employee ID to the student's home academic department and year in program
- Understanding how many existing resources could be redeployed and how many students were typically supported outside of the department allowed for more robust cohort sizes

# Missing Grades

- Dynamic tracking of outstanding grades
- Provide resources to instructors to complete grading
- Confirmation of when grading is complete
- Bonus: Grade distributions
- With two additional filters, this can become an ongoing report

School of Social Sciences Grades

## AD HOC REPORTS

---

- Reports created for a specific use or to answer a precise question on an “as needed” basis.
- **Benefits:**
  - Tailored reporting
  - Identifies reporting gaps
  - Can result in a core report

## CORE REPORTS

---

- Pre-defined reports that provide information targeting specific business operations across all units.
- **Benefits:**
  - Thoroughly validated
  - Foundation for other reports
  - “True” source
  - Fact checking/validation

# PRE & POST SAH

## DATA WAREHOUSE

- Manual data pulls every term
- Data was downloaded from data warehouse to local machines
- Summary tables created in spreadsheets and shared via email
- Reports are easy to change
- Lack of version control and sharing permissions

## STUDENT ACTIVITY HUB

- Fully automated after initial build
- Data can only be accessed with individual login to SAH
- Version control
- Automatic data refreshes until census date
- Can be accessed at any time by authorized users

# Enrollment Census

---

- Integral part of School reporting and operational needs including, but not limited to, the following:
  - Course scheduling
  - Resource management
  - External reporting
- Depending on access clearance provides student counts by:
  - Major
  - Demographics (gender, ethnicity, first-generation)
  - Degree Type (BS/MS/PhD)
  - Class Level
  - Applicant Type
  - Registration Status
  - Military Status
  - Citizenship Status (Resident/Non-Resident/International)

# DFW Rates

---

- Outcome of a Time-to-Degree Task Force
- Question: Why are undergraduate students taking longer than expected to graduate?
- Displays D, F, and W grades as a percentage of total enrollment by course
- **Results:**
  - Identifies bottleneck courses with high fail rates
  - Data-driven decision to increase specific course offerings
  - Early Student Affairs intervention to ensure timely graduation
  - Shared with and used by other Schools

# CORE REPORTING

# LESSONS LEARNED

---

## Validation

---

Need for granular validation to ensure accuracy at the lowest level of detail.

Non-technical users struggle to validate against source systems.

Resolution time impacts delivery timeline.

## Enhancements & Fixes

---

Identified issues join a development pathway

- timeline
- detailed definitions
- user acceptance testing

## Training

---

**Developers:** in BI tool & SAH

**Consumers:** how to interact with the report and data literacy

**All users:** data privacy and equity-informed data use

# DISCUSSION + Q&A
